Projects of FAI "RosKapStroy"

Construction of an embankment along the shore of the Saky Therapeutic Lake, Republic of Crimea, Saki town

Development of the Simferopol airport complex

"Lavna" coal transshipment complex at the Murmansk seaport

Construction of the "Trud" sports and recreation complex»

Restoration of the compound of the Khan's Palace facilities

Construction of all-season tourist and recreational complexes located in the North Caucasus Federal District

Engineering means of ensuring transport safety during construction of railway tracks to the Kerch Strait crossing point

Construction of on-site engineering networks on the territory of the Novodevichy Convent

Education for students from Arab countries in the Russian Federation

56 000

students from Arab countries study at Russian educational institutions

3 600

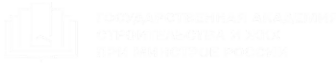

people travelled from Arabic-speaking countries to Russia in 2022 for the purpose of education

Trending upwards every year!

This makes this trend in education promising for both the Russian Federation and Arab countries

Increased demand for specialist training among Arab nationals

Necessity to improve approaches and curricula geared towards foreign nationals

FAI "RosKapStroy" is the legal successor of the State Academy of Advanced Training and Retraining of Personnel for Construction and Housing and Utilities Complex of the Russian Ministry of Construction (est.1966)

Currently, the Institution implements more than 120 educational programs of further/advanced training and professional retraining for engineering and workers' trades

Since September 2022, a virtual discussion platform for the professional community has been launched on the basis of the FAI "RosKapStroy"

FAI "RosKapStroy" regularly runs a vocationally oriented program "Young Builder's School" for middle and high school students as a basis for future workforce development in the construction industry.
